Office Action

Rejections Under 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Primot et al (Achromatic three-wave lateral shearing interferometer-1995).

Primot et al teach a wavefront sensor comprising placing crossed monodirectional gratings and creating and observing the image formed to derive slope information on the incident wavefront.

Response to Arguments

Applicant's arguments filed 26 March 2002 have been fully considered but they are not persuasive. Applicant has failed to distinguish between Primot et al and the rejected claims. In applicant's remarks applicant merely states that the article is related to the particular observing step of claim 1 but fails to address that on page 2684 Primot replaces the hexagonal grating with a square one for wavefront analysis.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire THREE MONTHS from the date of this action. In the event a first response is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.
